

Friday 26th June

Dear Miss Connell and Mr McKeon,

How are you both? Helping with the gravel was actually worth it because I got some new muscles and ten pound. I have done my science and made a lava lamp and have tried to make crystals. I might try the felt tip chromatography too. Me and Alfie went in the paddling pool and had a lovely time. It was so hot! We went to Aldeburgh beach yesterday afternoon and swam and got an ice cream. We saw some jellyfish! Arghhhhh! I painted one which was much safer! I will tell Tristan that you liked him. Mum says she will send in my story and some photos. Stay safe. Look forward to our next zoom.

Love Evie

X
